Task 3 | CSE0001 – Digital Literacy

Explore Coding & Collaboration Platforms

Name	Reg No.	Branch	Date
Prince Singh	22BCE10155	**CSE**	**22 March 2026**

Part A — Coding Practice (CodeChef)

Platform chosen: CodeChef (codechef.com) |

Challenge completed: Number Mirror (START01) — Beginner Level.

The challenge required practicing basic I/O (Input/Output) by reading a single integer and printing it back to the console. This is a foundational task to ensure the environment and compiler are configured correctly.

My Python 3 Solution:

Python

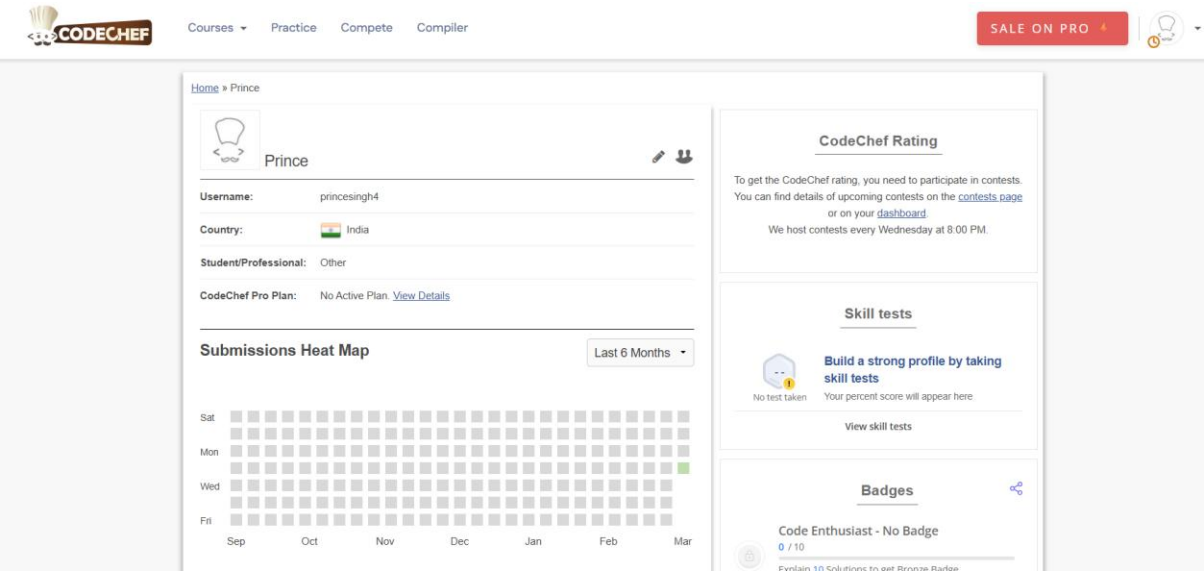
```
# Read the input integer

n = int(input())

# Print the same integer as output

print(n)
```

Result: 100/100 points — All test cases passed successfully. **Reflection:** CodeChef's platform is excellent for tracking my "Global Rank" and "Star Rating." I plan to participate in the *Starters* contests every Wednesday to improve my problem-solving speed under time pressure.



Part B — Google Forms Quiz -

I created a 'Digital Literacy Awareness Quiz' on Google Forms with 5 questions, linked to a Google Sheet for automatic response collection.

Form link (also in README.md):

Questions in the Form

1. (Multiple Choice) Which of the following is an example of phishing? (a) A link from your college portal (b) An email asking you to 'verify your bank account urgently' (c) A notification from your antivirus (d) A Google Calendar invite
2. (Multiple Choice) What makes a password strong? (a) Your date of birth (b) Your name followed by 123 (c) A mix of uppercase, lowercase, numbers, and symbols (d) A single dictionary word
3. (Multiple Choice) Which platform is most commonly used to share and collaborate on code? (a) Instagram (b) GitHub (c) WhatsApp (d) Telegram
4. (Short Answer) Name one thing you would do if you received a suspicious link from a known contact.
5. (Short Answer) What does 'digital footprint' mean to you in your own words?

☐ Record prince.25bce10155@vitbhopal.ac.in as the email to be included with my response

Which of the following is an example of phishing? 1 point

- ○ (a) A link from your college portal
- ◉ (b) An email asking you to 'verify your bank account urgently'
- ○ (c) A notification from your antivirus
- ○ (d) A Google Calendar invite

Clear selection

Untitled form Digital Literacy Awareness Quiz

Total points 3/5

The respondent's email (**prince.25bce10155@vitbhopal.ac.in**) was recorded on submission of this form.

✓ Which of the following is an example of phishing? 1/1

- ○ (a) A link from your college portal
- ◉ (b) An email asking you to 'verify your bank account urgently' ✓
- ○ (c) A notification from your antivirus
- ○ (d) A Google Calendar invite

✓ What makes a password strong? 1/1

- ○ (a) Your date of birth
- ○ (b) Your name followed by 123
- ◉ (c) A mix of uppercase, lowercase, numbers, and symbols ✓

Reflection

Both platforms I explored in this task will directly benefit my academic journey. Code Chef provides a structured, judge-graded environment for practising problem-solving — far more effective than reading theory alone, because I get instant feedback on whether my code is correct, efficient, and handles edge cases. Even completing one beginner challenge helped me understand the importance of writing clean, readable code.

Creating the Google Form was more thoughtful than I initially expected. Writing clear, unambiguous quiz questions is a real skill — my first draft of Question 1 had two plausible answers, and I had to revise it to make it fair. Google Workspace tools like Forms, Sheets, and Docs are used across every industry and academic discipline, and learning them now means I will be more productive from my very first group project or research assignment.

Together, these two tools represent two core skills: problem-solving practice and digital collaboration — both of which I will use throughout my four years at VIT Bhopal.
